

SOCIAL SERVICES DATA

The file “socserv.txt” contains information about 78 county-level Offices of Social Services in the state of Ohio. The dataset contains three variables. There is one line of data per observation, and adjacent variable values are separated by whitespace. The order of the variables on each line of the dataset is as follows:

Number of months the office has been open (Variable name is “months” in R scripts).

Mean number of clients per week, during the month immediately preceding the data collection (Variable name is “clients” in R scripts).

Mean number of clients per week, rounded off to units of 25 (Variable name is “client25” in R scripts).
